ECZEMA AND ALOE VERA TESTIMONIAL

My 14 year old son has suffered with eczema all his life since the age of 3 months. Sometimes the eczema is mild and other times he has severe flare-ups, which can last from 3 months to over a year. For the last year he has been suffering very badly with his entire face covered, neck, upper chest, groin, elbows and knees. The skin was very red, inflamed, scabby where he had scratched, and very, very dry and flaky. It has affected his moods, his sleep patterns and his general wellbeing.

At school, he was nicknamed the "Orange Refresher" as not only was his face red, he has red hair too!! We have tried everything to help him over the past year, from seeing a Nutritionalist, homeopathy and changing his diet. Consequently, 9 months and lots of money later - there was no improvement. I then came across FLP through a launch evening and tried the products on my son.

For the last 5 weeks, he has been drinking the Aloe Vera Gel (without any complaints!!) and applying Aloe Propolis cream twice a day. Initially it got slightly worse, but we persevered. I am so thrilled we did, because now 5 weeks on his face has completely cleared, he is sleeping better and is much happier in himself. His skin has completely lost all its dryness and looks great. All areas of eczema are disappearing on his body and he is a changed child. I would absolutely recommend these products wholeheartedly.

As a result of using these products, I am so excited by how they can help people, that I have joined Forever Living Products as a Distributor and really look forward to helping other people.
