

PSORIASIS

Ganders Park
Kingskerswell

24 April 1997

About 2 years ago I was diagnosed as having Psoriasis. The skin on my hands, feet and knees became progressively more scaly and calloused and would split open and bleed and refuse to heal. Walking became very painful and working as a Barber was very difficult and painful as the short hairs would get into the cuts on my hands.

Conventional medicine could not help despite specialist attention. I tried other alternative treatments with no effect and had just about given up hope when last summer I discovered Val, Vikki and Forever Living Products.

Vikki was confident that Forever Living Aloe Vera would be able to help where everything else had failed.

I started drinking the gel, using the soap and applying topical applications of the Gelly tube and later propolis crème. At first there seemed to be no improvement and after 8/9 weeks I almost gave up but my wife convinced me to at least give it the 90 days as recommended. How glad I am that I kept going.

My hands are now back to normal and my feet are no longer sore and bleeding and healthy new skin continues to replace the callous areas. I have a small persistent patch on my knee but I would say my Psoriasis is 95% better.

An added bonus to this is that my general health is much improved. Having suffered a mild heart attack about 7 years ago I have been on medication and I have felt tired and lethargic. Since taking Aloe Vera daily my energy level has improved and I feel much better in myself.

Thanks to Val, Vikki and Forever Living Products.
