

# “ALOE VERA HAS CHANGED MY LIFE”

says Mrs. C. Wright of  
Exeter, Devon

I have suffered from Arthritis for 20 years every year getting steadily worse, spreading throughout my body. The condition was treated with Cortisone injections and Indocid which controlled it to a certain extent but I was still left in considerable pain and feeling very tired. I had read about how Aloe Vera was completely safe, had no known side effects and was a natural anti-inflammatory but was sceptical about how it could possibly work. Then in March last year my daughter suggested I try Forever Living Aloe Vera. After three weeks I began to feel more alive, the pain and tiredness gradually left me. Now I feel 20 years younger, I have steadily improved. Free movement is such a pleasure to anyone and to me especially as I was such an athlete as a young woman. Now I can run again! it has changed my life. I generally feel so much better, my life has improved very dramatically, I have suffered no side effects. I have recommended many of my friends to try Forever Living Aloe Vera with equally positive results. Aloe Vera has put the joy back into my life. It's still working for me. All this and the company offers a full money back guarantee if it does not work for you!
