

## My Horse Tristan and Aloe Vera

I started using Forever Living Products natural Aloe Vera Gel for my elderly horse on the recommendation of a friend. Tristan was a 16h Irish Draft x Thoroughbred ex-show jumper. He had a fairly hard life on the show jumping circuit in his early years and this led to mild arthritis in his later life.

At 20+ years old he started to become stiff in the mornings and took a while to warm up, so we introduced Forever Living Products Aloe Vera drink to his morning feed. After a period of 3 - 4 weeks there was a noticeable change in his stiffness and he started to become more flexible in his joints.

With the help of the Aloe Vera from Forever Living Products I was able to successfully compete Tristan for fun at a local level, including show jumping and dressage, into his late twenties, and only gave up riding him at 32 years old due to old age finally getting the better of him.

Unlike other pain relief such as Bute, Forever Living Products Aloe Vera Gel is a natural supplement which won't cause long term liver or kidney damage. I would thoroughly recommend that horse owners try this product on their horses with stiffness problems and see the long term results for themselves.
