Dear Cliff & Marion

We would like to share our experiences with ~~the~~ FOREVER LIVING ALOE VERA GEL. You may show this to others who may have similar conditions. We started Aloe Gel in January 96. And after just one week we had a general feeling of well being.

I was so enthusiastic that I tried stop taking my Hismanal, which I had been taking daily for Asthma and allergies. At this stage I became Wheezy after about 2 days. So I took the pill, and then went another 2 days, then 4 days etc. Now after 4 months, I take no HISMANAL at all, and I have no wheezyness whatsoever good eh!

Bryan has had ULCERS for many years. He was a regular user of Zantec and Gaviscon. He again didn't really see very much improvement for a few months. The crunch came when Bryan spent the whole weekend in bed. He was really unwell for 24 hours. I suggested he took the Aloe Gel, sipping it all day.

The diarrhoea stopped by the evening. He was up dressed and doing the ironing which was fantastic. Bryan only takes the Aloe now, NO DRUGS and plenty of water.

I am so pleased with the F L P products, I could go on and on. I have now decided to become a distributor, so I could help others to help themselves.

Yours sincerely

Engela Pearce
