

## Aloe Vera Testimonial IBS

Mary Jane Gray,  
Basingstoke,  
Hants

19<sup>th</sup> December 2009.

In March 1999 I celebrated my 29<sup>th</sup> birthday, but on 14<sup>th</sup> April that year my world collapsed around me. I started going to the loo a lot, up to 14 times a day and it would not stop, with me eventually having only 1 meal a day, and then visiting the doctors every week. I eventually ended up in the Gastro Unit at the North Hampshire Hospital in Basingstoke where they struggled to find out what was wrong with me.

I had a Colonoscopy in the September, a Gastroscopy in the November, and then in January 2000 was diagnosed with I.B.S. In the same month I had a biopsy taken from under my left breast which turned out to be Hailey Haitleys disease, a rare skin complaint which cannot be cured. In June 2000 I was also diagnosed with Reynards disease which quickly put me in a wheel chair as I could not be on my feet for more than half an hour at a time due to the danger of me having a heart attack at any time.

I suffered for many years until in October 2009 my Brother-in-law Ian Digby took me to a business presentation evening in Basingstoke regarding Forever Living Products, and after hearing all about the company and its products, I started to drink their Aloe Vera Gel. After about a month my I.B.S started to improve and I was also able to walk a little further than I used to. I was so amazed at how I was starting to feel that I was invited and went to a company Success Day at Alexandra Palace in London where I met Bob Parker the Managing Director of Forever in the UK.

I have to admit that I have not enjoyed myself so much in years. I was on a high for a long time afterwards, and because of the products and that day in London, in December I joined the company. I am so excited as already I have one customer and 2 people are interested in the opportunity. I also went to the company Success Day and Christmas Party in Telford in December and enjoyed that immensely. I really have not had this much fun since I was 22, and because of the products and the opportunity that Forever offers, I now feel on top of the world!

Since taking the Aloe Vera Gel I have stopped taking 7 tablets a day, and what a difference the Aloe has made to my life!! I take it twice a day every day and now even give it to my cat too. I would recommend anyone to try this product for themselves. If it does half for them what it has done for me they will be truly amazed. My eternal thanks go to my brother in law Ian for introducing me to Forever, Dennis Paynter for all his support, and to Elaine and Brian my upline Senior Managers for their unwavering help and support.

And lastly, thank you Forever Living Products...You are my number one.

Mary.
