

IBS

Sue Rowbotham

02/01/02

I have suffered from Irritable Bowel Syndrome for several years. I could not understand what was wrong with me. Finally, I could not stand the discomfort any more and went to see the GP. I did not even know what IBS was, all I knew was that I had continual indigestion and always felt so bloated, as though I was over-eating at every meal. My GP put me on various spasmodic drugs, they just seemed to keep the symptoms under control, but now and again it would flare up.

I have been taking the Aloe Vera Gel since August 2001. After drinking the second bottle I could definitely feel an improvement and I am very pleased to say that now I do not have any symptoms. I can eat anything I like and it is fantastic to be able to take a completely natural product and not to have to take prescription drugs, which can produce awful side effects.

Originally, when introduced to FLP, I was interested in the powers of Aloe Vera and how natural products could play a part in improving the quality of life. I just did not realise how powerful Aloe Vera was. I am now totally convinced in FLP products and will use them for the rest of my life. I also get a great deal of pleasure in letting other people know of the benefits; to improve their lives, whether to complement their health or improve their lifestyles.

I would like to thank Paul for introducing us to this wonderful company and, to FLP your products are amazing. We look forward to a journey of a lifetime.
